### Service Maintenance

Your Čezeta Type 506 electric requires no oil changes, fuel filters, spark plugs or emission checks. Instead we recommend an Annual Maintenance Inspection of your vehicle and we implement any available upgrades that improve your Čezeta. Maintenance concentrates on: tyre condition and alignment, brake check and brake fluid replacement, electrical system safety check, diagnostic report from MCU, battery check and balancing if required, mechanical review of the frame and bearings, valet service and an upgrade advice report.

Annual Maintenance Inspections are ordered from Čezeta Motors or your nearest Čezeta Authorised Service Centre.

### Territories covered and method of support
